Date: June 26, 2025
Presenter: Prathamesh Wadile,
Director of Sharkweb

94%

OF FIRST IMPRESSIONS OF YOUR BUSINESS COME FROM YOUR SOFTWARE.

▶ **Poor software isn't just inconvenient :-**

It's costing you trust, conversions, and credibility.
Every glitch, delay, or confusing layout sends users away, damages your brand, and drives up support costs. In today's digital-first world, your software is your business — make sure it's working for you, not against you.

▶ **Polished software isn't just pretty — it's powerful**

It builds trust, boosts engagement, and turns visitors into loyal customers. A seamless user experience lowers costs, drives conversions, and transforms users into your biggest promoters. In short, great software grows your business — every click of the way.

😔THE HIDDEN COST OF BAD SOFTWARE

"Businesses lose up to 30% of their productivity because of outdated or inefficient systems."

That's hours wasted. Opportunities missed. Revenue lost.
And it's not just numbers — it's your team feeling frustrated, your customers walking away, and your business falling behind.

Pain we see every day:

▶ Outdated systems slowing everything down.

▶ Clunky, frustrating user experiences driving users away.

▶ Revenue slipping through the cracks due to lack of automation.

"Running your business should feel empowering — not exhausting. With the right software, it can."

🌟 HOW WE TURN FRUSTRATION INTO FLOW

## "We don't just build apps — we build assets that empower your business to thrive."

Say goodbye to the stress of clunky systems and hello to software that actually works for you.

Here's how we do it:

▶ 🎯 Tailored Software Development
Built around your unique needs, goals, and workflows.

▶ ✨ Seamless UX/UI
Beautiful, intuitive designs that your users will love using.

▶ ⚙ Automation & Scalability
Free up your team, speed up your growth — and never outgrow your tech.

OUR SERVICES

Custom Software Development

SaaS Product Engineering

Web & Mobile Apps

Integrations, APIs, and Cloud DevOps

Brief icons or graphics to represent each

WHY WE'RE DIFFERENT

▶ Expert team with 10+ years experience

▶ Agile development for faster delivery

▶ Transparent pricing & weekly reports

▶ 100% satisfaction guarantee

▶ We work with our clients for long period of time. 🤗

PROCESS THAT DELIVERS

Development

We turn your ideas into clean, scalable code using the right tech for your goals.

Full Deployment

Beyond launch, we support and upgrade your software as your business grows.

Testing

Every feature is tested thoroughly to ensure it's fast, functional, and bug-free.

Launch Phase

We handle deployment smoothly so your launch is stress-free and successful.

TECH STACK & CAPABILITY

▶ "We use the best tech for the best results — built to scale, perform, and evolve."

🔥 Core Stack We Use:

- Frontend: React.js / Next.js for fast, SEO-friendly, modern interfaces
- Backend: Node.js + Express.js for scalable, high-performance APIs
- Database: MongoDB for flexible, cloud-native data management
- AI Integration: TensorFlow.js for real-time, in-browser machine learning

✅ Why It Matters:

- ⚡ Speed: Server-side rendering + optimized frontend performance
- 📈 Scalability: Modular architecture that grows with your business
- 🧠 Intelligence: AI-powered features for smarter, more responsive apps
- 🔒 Maintainability: Clean code, easy updates, and long-term flexibility
